

## New Trips in 2009:

### Five Day/Four Night Trips

Demand for shorter duration trips by some anglers and the corporate sector has us offering weekend five day/four night packages running Friday through Tuesday. With no overnight in Cairns, you leave the office on Friday and fly all the way to Cape York where we collect you, put you on the boat and go for four nights and 3 big days of fishing. On Tuesday, you will be back on the plane to Cairns for connecting flights south to have you home on Tuesday night. If this is something your group would like to do, please email us for availability of dates.

### Six full days fishing with Regional Pacific's new Cairns-Cape York schedule

We now offer an extra half day fishing at no extra cost. The only boat traveling days are flying days, leaving the six full days in between for fishing. The air travel between Cairns and Cape York is part of our package price.

Schedule for the service below. Flight closes 30 minutes prior to departure.

MON TUE THUR. dpts CNS 10:00 arr YNPE 11:45. dpts YNPE 12:15 arr CNS 14:00

FRI. dpts CNS 14:00 arr YNPE 15:45 dpts YNPE 16:15 arr CNS 18:00

### Crab Island Sea Turtle Breeding Tours

In October we are planning a couple of eco tours to Crab Island, which is the largest Flatback Turtle rookery in the world. Witness hundreds of Sea Turtles nesting and thousands of hatchlings emerging and making their way to the sea. Crocodiles in their natural habitat, preying on the turtles, can also be seen from the safety, security and comfort of our mothership, attendant vessels and all terrain vehicles. Fishing, crabbing and bush walking tours also conducted on these trips to client demand. This is a very exciting opportunity for an unforgettable life experience in conjunction with scientific researcher, Brett Lees and his continuing Sea Turtle studies. If you are interested have a look at Brett's informative web log with photos of his 2008 Crab island work visit <http://www.crabislandflatbacks.blogspot.com>

Watch for more on this later in 2009 as we develop the program, or email us now with any enquiries about this exciting new adventure.
